The most ingenious of Oscar Wilde's satires, adapted to your students' level, **is an excellent opportunity for them to put their knowledge into practice, while at the same time discovering a classic piece of literature. Intended to be included as part of the class dynamic like any other unit,** your students will enjoy this master class from the beginning. Take this chance to recommend it as this year's reading, and complement it with the play and teaching resources we offer... for the most paranormal class of the year!
